AB-AI-001 — AI Usage Policy

Enterprise AI Decision & Knowledge Platform for Modern Banking

---

Document Information

Field	Details
Document Title	AI Usage Policy
Document ID	**AB-AI-001**
Department	Artificial Intelligence & Innovation
Version	v1.2
Last Updated	July 24, 2026
Document Owner	Chief AI Officer (CAIO)
Classification	Internal
Review Date	July 24, 2027
Approved By	**Sami Khan – Chief Executive Officer (CEO)**

Confidentiality Notice

This document defines the approved usage guidelines, security requirements, ethical standards, and operational controls for Artificial Intelligence systems within Aegis Bank.

The purpose of this policy is to ensure AI technologies are used securely, responsibly, and in alignment with banking regulations.

Unauthorized use of AI systems or disclosure of confidential information is strictly prohibited.

---

1. Purpose

The purpose of this policy is to establish standards for the secure and responsible use of Artificial Intelligence technologies at Aegis Bank.

This policy ensures:

- Safe AI adoption.
- Protection of customer information.
- Responsible decision-making.
- Compliance with banking requirements.
- Transparency in AI operations.

---

2. Scope

This policy applies to:

- All Aegis Bank employees.
- AI engineers.
- Software developers.
- Data scientists.
- Business teams.
- External technology partners.

It covers AI usage in:

- Customer service.
- Risk analysis.
- Fraud detection.
- Internal knowledge management.
- Document processing.
- Decision support systems.

---

3. AI Governance Principles

Aegis Bank follows these AI principles:

Transparency

AI systems must provide understandable explanations.

Security

AI systems must protect confidential information.

Privacy

Customer and employee data must be handled securely.

Human Control

Important decisions require human validation.

Fairness

AI systems must avoid unfair outcomes.

Accountability

AI usage must have responsible owners.

---

4. Approved AI Usage Areas

Employees may use AI systems for approved business purposes.

Internal Knowledge Assistance

Example:

Employee asks:

"What is Aegis Bank's AML procedure?"

AI retrieves approved internal documents.

Document Analysis

AI may assist with:

- Policy summaries.
- Report analysis.
- Document classification.

Customer Support Assistance

AI may help:

- Categorize complaints.
- Suggest responses.
- Improve support efficiency.

Risk & Compliance Support

AI may assist:

- Fraud detection.
- Risk analysis.
- Compliance monitoring.

---

5. Employee AI Responsibilities

Employees using AI systems must:

- Follow approved AI policies.
- Protect confidential information.
- Verify AI-generated information.
- Report AI issues.

Employees must not:

- Share customer secrets.
- Upload restricted documents to unauthorized AI tools.
- Depend on AI without verification.

---

6. Restricted AI Activities

The following activities are prohibited:

Unauthorized AI Tools

Employees cannot use unknown AI platforms for banking information.

Sensitive Data Upload

Restricted data must not be entered into public AI systems.

Examples:

- Customer identity records.
- Account information.
- Internal security documents.

Automated Final Decisions

AI cannot independently approve:

- Loans.
- Account closures.
- Regulatory decisions.

---

7. AI Data Protection Requirements

AI systems must protect information through:

- Access control.
- Encryption.
- Data classification.
- Audit logging.

Data Classification

AI systems must respect:

Classification	AI Usage
Public	Allowed
Internal	Approved systems only
Confidential	Restricted access
Restricted	Special authorization required

---

8. Human Oversight Requirements

Aegis Bank follows a Human-in-the-Loop approach.

AI provides:

- Recommendations.
- Analysis.
- Insights.

Humans provide:

- Final approval.
- Business decisions.
- Regulatory judgment.

Example:

AI:

"Customer loan risk score is high."

Human:

Reviews information and makes final decision.

---

9. AI Decision Making Standards

AI decisions must be:

- Explainable.
- Traceable.
- Reviewable.
- Documented.

Required information:

- Input data.
- AI model used.
- Generated output.
- Human review record.

---

10. Aegis AI OS Usage Guidelines

Aegis AI OS is the internal enterprise AI knowledge platform.

Employees can ask questions related to:

- Policies.
- SOPs.
- Procedures.
- Internal documentation.

AI Response Flow:

Employee Question

↓

Authentication Check

↓

Document Permission Validation

↓

RAG Retrieval

↓

LLM Processing

Final Answer

---

11. AI Security Controls

Aegis AI systems implement:

- Identity verification.
- Role-based access.
- Prompt protection.

- Data filtering.
- Monitoring.

---

12. AI Monitoring Requirements

AI systems must monitor:

- User activity.
- Prompt history.
- Response quality.
- Security events.
- Model performance.

Aegis AI OS uses:

- LangFuse tracing.
- Evaluation metrics.
- Audit logs.

---

13. AI Risk Management

AI risks include:

- Incorrect responses.
- Data leakage.
- Bias.
- Security attacks.

Controls:

- Testing.
- Monitoring.
- Human review.

- Continuous improvement.

---

14. Employee AI Training

Employees must receive training on:

- AI security.
- Responsible usage.
- Data protection.
- AI limitations.

---

15. Practical Examples

Example 1 — Policy Search

Employee:

"What is our remote work policy?"

AI:

- Searches approved documents.
- Retrieves policy.
- Provides source reference.

Example 2 — Incorrect AI Response

Situation:

AI provides unsupported information.

Action:

- Employee reports issue.
- AI team investigates.
- Knowledge source updated.

Example 3 — Confidential Data Request

Employee asks AI to analyze customer records.

System:

- Blocks unauthorized request.
- Creates security log.

---

16. Frequently Asked Questions (FAQs)

Q1. Can employees use any AI tool?

No. Only approved AI systems may be used for banking activities.

Q2. Can AI make banking decisions automatically?

No. Critical decisions require human approval.

Q3. How does Aegis protect AI data?

Through encryption, access control, monitoring, and governance controls.

Q4. What is Aegis AI OS?

It is an internal AI knowledge platform using RAG technology to provide secure document-based answers.

Q5. Why is AI governance important?

It ensures AI is secure, ethical, reliable, and compliant.
