---

1. Purpose

The purpose of this policy is to define responsible AI standards for Aegis Bank.

This policy ensures AI systems:

- Operate ethically.
- Provide reliable results.
- Protect user privacy.
- Support human decision-making.
- Maintain customer trust.

---

2. Scope

This policy applies to:

- AI engineers.
- Data scientists.
- Developers.
- Security teams.
- Compliance teams.
- Business users.
- External AI providers.

It covers:

- Aegis AI OS.
- Machine learning models.
- Large Language Models.
- RAG systems.
- AI-powered business applications.

---

3. Responsible AI Principles

Aegis Bank follows six core responsible AI principles.

3.1 Transparency

AI systems must provide understandable outputs.

Users should know:

- When AI is being used.
- How responses are generated.
- What sources support the answer.

Example:

Aegis AI OS response:

Answer:

Employees must use MFA for all banking systems.

Source:

AB-SEC-002 MFA Policy

Section:

4.1 Authentication Requirements

3.2 Fairness

AI systems must avoid unfair or discriminatory outcomes.

Aegis Bank performs:

- Bias testing.
- Output evaluation.
- Continuous monitoring.

Example:

AI-based risk analysis must evaluate customers using approved financial criteria rather than unrelated personal characteristics.

3.3 Accountability

Every AI system must have responsible ownership.

Responsibilities include:

- AI development team.
- System owner.
- Security reviewer.

- Business owner.

3.4 Privacy Protection

AI systems must protect personal and confidential information.

Controls include:

- Data encryption.
- Access control.
- Data minimization.
- Secure storage.

3.5 Human Oversight

AI supports humans but does not replace human responsibility.

Critical decisions require human approval.

Examples:

- Loan approval.
- Fraud investigation.
- Regulatory decisions.

3.6 Safety & Reliability

AI systems must be:

- Tested.
- Monitored.
- Evaluated.
- Improved continuously.

---

4. AI Accountability Framework

Aegis Bank follows a clear ownership model.

AI Governance Team

Responsible for:

- Policies.
- Standards.
- Risk reviews.

AI Engineering Team

Responsible for:

- Model development.
- Prompt management.
- System performance.

Security Team

Responsible for:

- AI security.
- Threat detection.
- Access controls.

Business Owners

Responsible for:

- Correct business usage.
- Human validation.

---

5. Transparency & Explainability

AI systems must provide explanations whenever required.

Aegis AI OS provides:

- Retrieved documents.
- Source references.
- Confidence scores.
- Processing traces.

Example:

Employee Question:

"What is the customer verification process?"

AI Response:

Answer:

Customer identity must be verified before account activation.

Source:

AB-OPS-002 KYC Policy

Confidence Score:

95%

---

6. Fairness & Bias Prevention

Aegis Bank prevents AI bias through:

- Dataset reviews.
- Model evaluation.
- Human assessment.
- Regular audits.

Potential Bias Risks:

- Unequal recommendations.
- Incorrect classifications.
- Unfair decision patterns.

---

7. Human Oversight Standards

Human review is mandatory for high-impact AI usage.

AI Can:

✅ Analyze information
✅ Summarize documents
✅ Provide recommendations
✅ Assist employees

AI Cannot:

❌ Make final regulatory decisions
❌ Approve sensitive banking actions independently
❌ Override human authority

---

8. Privacy & Data Protection

Responsible AI requires strong data protection.

Aegis Bank follows:

- Data classification policies.
- Privacy regulations.
- Security standards.

AI systems must not:

- Store unnecessary information.
- Reveal confidential data.
- Access unauthorized documents.

---

9. AI Safety Requirements

AI systems must implement:

Input Protection

Prevent malicious requests.

Output Validation

Check generated responses.

Monitoring

Track system behavior.

Recovery

Handle failures safely.

---

10. Responsible AI Lifecycle

Every AI system follows:

Planning

↓

Risk Assessment

↓

Development

↓

Testing

↓

Approval

↓

Deployment

↓

Monitoring

↓

Continuous Improvement

---

11. AI Governance Committee

Aegis Bank maintains an AI Governance Committee.

Members:

- CEO.
- Chief AI Officer.
- Security Lead.
- Compliance Lead.
- Engineering Lead.

Responsibilities:

- Approve AI projects.
- Review risks.
- Monitor compliance.
- Evaluate AI impact.

---

12. AI Audit Requirements

AI systems are regularly audited.

Audits review:

- Model performance.
- Security controls.
- Data usage.
- User access.
- Compliance status.

Audit evidence includes:

- AI logs.
- LangFuse traces.

- Evaluation reports.
- Approval records.

---

13. Practical Examples

Example 1 — AI Customer Support Assistant

AI:

Provides suggested customer responses.

Human:

Reviews before sending.

Example 2 — AI Compliance Assistant

Employee asks:

"What are AML requirements?"

AI:

Retrieves approved AML documents and provides source references.

Example 3 — AI Error Handling

AI generates incorrect information.

Process:

1. Issue reported.
2. Trace reviewed.
3. Source documents checked.
4. System improved.

---

14. Frequently Asked Questions (FAQs)

Q1. Why is responsible AI important for banking?

Because banking decisions require trust, security, and accountability.

Q2. Can Aegis AI replace employees?

No. AI assists employees and improves productivity.

Q3. How does Aegis prevent unfair AI decisions?

Through testing, monitoring, and human oversight.

Q4. Does Aegis AI provide explanations?

Yes. Aegis AI OS provides sources, confidence scores, and traces.

Q5. Who is responsible for AI systems?

Assigned AI owners and governance teams are responsible.
