---

1. Purpose

The purpose of this document is to establish a structured escalation framework for customer support issues.

This ensures:

- Faster issue resolution.
- Clear ownership.
- Better customer experience.
- Effective communication.
- Reduced operational risk.

---

2. Scope

This document applies to:

- Customer Support Teams.
- Operations Teams.
- IT Support.
- Security Department.
- Compliance Department.
- Management Teams.

It covers:

- Customer complaints.
- Technical issues.
- Security incidents.
- Transaction problems.
- Service disruptions.

---

3. Escalation Principles

Aegis Bank follows these principles:

Ownership

Every issue must have a responsible owner.

Timely Response

Issues must be handled according to priority.

Clear Communication

Teams must maintain proper communication during escalation.

Customer Protection

Critical customer impacts receive immediate attention.

Documentation

All escalated issues must be recorded.

---

4. Issue Priority Classification

Issues are classified into four levels.

Priority 1 — Critical

Impact:

Severe business or customer impact.

Examples:

- Banking system outage.
- Large-scale transaction failure.
- Security breach.
- Customer data exposure.

Response:

Immediate action required.

Priority 2 — High

Impact:

Significant customer impact.

Examples:

- Account access failure.
- Payment processing issue.

- Card service disruption.

Response:

Urgent investigation required.

Priority 3 — Medium

Impact:

Limited customer impact.

Examples:

- General complaints.
- Service questions.
- Minor technical issues.

Response:

Handled through standard workflow.

Priority 4 — Low

Impact:

Minimal impact.

Examples:

- Information requests.
- General feedback.
- Suggestions.

Response:

Handled during normal operations.

---

5. Escalation Levels

Aegis Bank follows a four-level escalation model.

Level 1 — Customer Support Agent

Responsibilities:

- Receive customer request.
- Verify information.
- Provide basic resolution.
- Create support ticket.

Level 2 — Support Supervisor

Responsibilities:

- Review unresolved issues.
- Provide additional guidance.
- Coordinate with departments.

Level 3 — Department Manager

Responsibilities:

- Handle complex cases.
- Approve special actions.
- Coordinate multiple teams.

Level 4 — Executive Management

Responsibilities:

- Handle critical incidents.
- Make business decisions.
- Manage major customer impact.

---

6. Department Responsibility Matrix

Issue Type	Responsible Department
Account Issues	Banking Operations
Transaction Problems	Payment Operations
Security Concerns	Information Security
Technical Problems	IT Department
Compliance Issues	Compliance Team
AI System Issues	AI Engineering Team

---

7. Response Time Standards

Priority	Initial Response	Resolution Target
Critical	Immediate	According to incident recovery plan
High	Within 1 hour	Within 24 hours
Medium	Within 8 hours	Within 3 business days
Low	Within 24 hours	Within 5 business days

---

8. Emergency Escalation Process

For critical incidents:

Issue Detected

↓

Support Team Notification

↓

Manager Escalation

↓

Specialized Team Activation

↓

Executive Notification

↓

Resolution & Review

Examples:

- Banking platform outage.
- Cybersecurity incident.
- Major payment failure.

---

9. Management Notification Rules

Management must be informed when:

- Customer impact is significant.
- Regulatory risk exists.
- Security incident occurs.

- Resolution requires executive approval.

Notification includes:

- Issue summary.
- Impact assessment.
- Actions taken.
- Current status.
- Recovery plan.

---

10. AI-Assisted Escalation Support

Aegis AI OS supports escalation teams.

AI can assist with:

- Issue classification.
- Policy retrieval.
- Previous case analysis.
- Suggested resolution steps.

AI Workflow:

Customer Issue

↓

AI Classification

↓

Priority Detection

↓

Relevant Policy Retrieval

↓

Suggested Escalation Path

↓

Human Approval

AI does not independently escalate critical banking decisions.

---

11. Escalation Documentation

Every escalation record must include:

- Ticket ID.
- Customer information.
- Issue description.
- Priority level.
- Assigned team.
- Actions performed.
- Resolution details.

Records are maintained for:

- Audits.
- Performance analysis.
- Service improvement.

---

12. Practical Examples

Example 1 — Customer Cannot Access Account

Process:

1. Level 1 verifies identity.
2. Issue diagnosed.
3. Level 2 handles if unresolved.
4. Security team involved if suspicious.

Example 2 — Payment System Failure

Process:

1. Critical ticket created.
2. Operations team notified.
3. IT investigates system issue.
4. Management receives updates.

Example 3 — Suspicious Customer Activity

Process:

1. Support identifies risk.
2. Security team notified.
3. Compliance review initiated.

4. Customer communication managed.

---

13. Frequently Asked Questions (FAQs)

Q1. Why is escalation required?

To ensure complex issues reach the correct experts quickly.

Q2. Who handles critical customer incidents?

Critical incidents are managed by specialized teams with management oversight.

Q3. Can AI automatically escalate issues?

AI suggests escalation paths, but humans approve actions.

Q4. How are escalation priorities decided?

Based on customer impact, business risk, and urgency.

Q5. Are escalations tracked?

Yes. All escalations are documented and reviewed.

---
