Document Information

Field	Details
Document Title	Disaster Recovery Plan
Document ID	**AB-CYB-006**
Department	Cybersecurity & IT Operations
Version	v1.2
Last Updated	July 24, 2026
Document Owner	Disaster Recovery Manager
Classification	Restricted
Review Date	July 24, 2027
Approved By	**Sami Khan – Chief Executive Officer (CEO)**

Confidentiality Notice

This Disaster Recovery Plan (DRP) establishes the procedures required to recover Aegis Bank's critical business operations, IT infrastructure, and AI services following a disruptive event.

The objective is to minimize operational downtime, protect customer information, and restore essential banking services within defined recovery objectives.

Unauthorized disclosure of this document is prohibited.

1. Purpose

The purpose of this Disaster Recovery Plan is to ensure Aegis Bank can rapidly recover critical banking operations after a disaster while maintaining data integrity, security, and regulatory compliance.

Objectives include:

- Minimize service disruption.
- Protect banking data.
- Restore critical systems.
- Maintain customer trust.
- Support business continuity.

---

2. Scope

This plan applies to:

- Data Centers
- Cloud Infrastructure
- AI Platform (Aegis AI OS)
- Banking Applications
- Customer Portals
- Internal Business Systems
- Disaster Recovery Sites

Applicable departments:

- IT Operations
- Cybersecurity
- AI Engineering
- Risk Management
- Business Continuity Team

---

3. Disaster Recovery Objectives

Primary objectives include:

- Rapid restoration of banking services.
- Protection of customer and financial data.
- Recovery of AI knowledge systems.
- Secure restoration of infrastructure.
- Regulatory compliance during recovery.

---

4. Disaster Recovery Team

Role	Responsibility
Disaster Recovery Manager	Overall recovery coordination
CIO	Executive oversight
IT Operations Team	Infrastructure recovery
Cybersecurity Team	Security validation
AI Engineering Team	AI platform restoration
Database Administrators	Database recovery
Communications Team	Internal & external updates

---

5. Critical Business Systems

Recovery priority:

Priority	System
Critical	Core Banking Platform
Critical	Customer Authentication Services
Critical	Payment Processing
Critical	Aegis AI OS (RAG Platform)
High	Document Management System
High	Employee Portal
Medium	Internal Reporting Systems

---

6. Risk Scenarios

Potential disasters include:

- Cyberattacks (Ransomware)
- Data Center Failure

- Cloud Service Outage
- Database Corruption
- Network Failure
- Hardware Failure
- Natural Disasters
- Power Outages
- Insider Threats
- AI Platform Failure

---

7. Disaster Recovery Process

Incident Detected

↓

Disaster Declared

↓

DR Team Activated

↓

Damage Assessment

↓

System Recovery

↓

Security Validation

↓

Business Verification

↓

Normal Operations Restored

---

8. Backup & Recovery Strategy

Aegis Bank maintains:

- Daily incremental backups.
- Weekly full backups.
- Encrypted backup storage.
- Off-site backup replication.
- Cloud disaster recovery environment.

Backup principles:

- Encryption at rest.
- Encryption in transit.
- Integrity verification.
- Automated backup monitoring.

---

9. Recovery Time Objectives (RTO) & Recovery Point Objectives (RPO)

System	RTO	RPO
Core Banking	2 Hours	15 Minutes
Customer Authentication	1 Hour	5 Minutes
Payment Processing	2 Hours	15 Minutes
Aegis AI OS	4 Hours	30 Minutes
Document Management	6 Hours	1 Hour
Employee Portal	8 Hours	2 Hours

---

10. Communication Plan

During a disaster:

- Notify Executive Management.
- Activate Disaster Recovery Team.
- Inform affected departments.
- Provide customer updates when required.
- Notify regulators if applicable.
- Record all communications.

---

11. AI Platform Recovery

Recovery process for Aegis AI OS:

Restore Infrastructure

↓

Recover Vector Database

↓

Restore LLM Services

↓

Recover Enterprise Documents

↓

Validate Embeddings

↓

Run Security Checks

↓

Resume AI Operations

Recovery includes:

- FAISS/Vector database restoration.
- Enterprise policy documents.
- Prompt templates.
- AI configuration files.

- Audit logs.
- Model configurations.

---

12. Disaster Recovery Testing

The DR Plan must be tested:

- Quarterly tabletop exercises.
- Semi-annual recovery simulations.
- Annual full disaster recovery drill.
- Post-incident validation testing.

Testing verifies:

- Recovery time achievement.
- Backup integrity.
- AI service restoration.
- Communication effectiveness.

---

13. Roles & Responsibilities

Team	Responsibilities
IT Operations	Recover infrastructure
Cybersecurity	Validate secure restoration
AI Engineering	Restore AI systems
Database Team	Recover databases
Compliance	Regulatory coordination
Executive Management	Strategic decisions

---

14. Practical Examples

Example 1 — Ransomware Attack

Process:

1. Isolate infected systems.
2. Activate DR Team.
3. Restore clean backups.
4. Validate system integrity.
5. Resume banking services.

Example 2 — Cloud Outage

Process:

1. Detect outage.
2. Switch to disaster recovery environment.
3. Restore critical services.
4. Monitor application performance.
5. Notify stakeholders.

Example 3 — AI Platform Failure

Process:

1. Recover vector database.
2. Restore LLM services.
3. Reload enterprise documents.
4. Validate retrieval accuracy.
5. Resume AI operations.

---

15. Frequently Asked Questions (FAQs)

Q1. What is the purpose of the Disaster Recovery Plan?

To restore critical banking and AI services after a disaster with minimal downtime.

Q2. How often are backups performed?

Incremental backups are performed daily, with full backups conducted weekly.

Q3. What is the difference between RTO and RPO?

- **RTO (Recovery Time Objective):** Maximum acceptable time to restore a service.
- **RPO (Recovery Point Objective):** Maximum acceptable amount of data loss measured in time.

Q4. Does the Disaster Recovery Plan include Aegis AI OS?

Yes. The plan includes recovery procedures for the AI platform, vector database, enterprise documents, and AI configurations.

Q5. How often is the DR Plan tested?

Quarterly exercises, semi-annual simulations, and an annual full recovery drill.
