---

1. Purpose

The purpose of this SOP is to establish a standardized procurement process at Aegis Bank.

This document ensures:

- Controlled purchasing.
- Cost optimization.
- Vendor quality assurance.
- Compliance with financial policies.
- Reduction of procurement risks.

---

2. Scope

This SOP applies to:

- All departments requesting purchases.
- Procurement team.
- Finance department.
- Vendor management teams.
- Executive management.

It covers:

- Technology purchases.
- Software licenses.
- Cloud services.
- Office equipment.
- External business services.

---

3. Procurement Principles

Aegis Bank follows these principles:

Transparency

All purchasing activities must be properly documented.

Competitive Selection

Multiple vendors should be evaluated where applicable.

Cost Efficiency

Purchases must provide business value.

Security Compliance

Vendors must meet security requirements.

Accountability

Every purchase must have an approved owner.

---

4. Procurement Categories

Procurement is divided into:

Technology Procurement

Examples:

- Cloud platforms.
- Security software.
- Development tools.
- Hardware equipment.

Operational Procurement

Examples:

- Office supplies.
- Business services.
- Facilities requirements.

Professional Services

Examples:

- Consulting services.
- Training providers.

- External specialists.

---

5. Purchase Request Process

Procurement workflow:

Department Need Identified

↓

Purchase Request Created

↓

Manager Approval

↓

Procurement Review

↓

Vendor Selection

↓

Purchase Approval

↓

Order Placement

Required information:

- Requesting department.
- Business justification.
- Estimated cost.
- Required timeline.
- Technical requirements.

---

6. Vendor Selection Process

Vendor selection includes:

Requirement Analysis

Understanding business needs.

Market Research

Finding suitable vendors.

Vendor Comparison

Evaluating:

- Price.
- Quality.
- Security.
- Support.
- Reliability.

Final Selection

Best-value vendor is selected.

---

7. Vendor Evaluation Criteria

Vendors are evaluated on:

Criteria	Description
Cost	Pricing competitiveness
Quality	Product/service quality
Security	Data protection standards
Reliability	Service availability
Support	Customer service capability
Compliance	Regulatory alignment

---

8. Approval Workflow

Purchase approvals depend on value and risk.

Standard Approval Flow

Employee Request

↓

Department Manager

↓

Procurement Team

↓

Finance Review

↓

Executive Approval

↓

Purchase Completion

Approval Authority Matrix

Purchase Amount	Approval Required
Up to $1,000	Department Manager
$1,001 - $10,000	Department Head
$10,001 - $50,000	Finance Director
Above $50,000	Executive Management

---

9. Purchase Order Management

Approved purchases require a Purchase Order (PO).

PO includes:

- Vendor details.
- Product/service description.
- Approved amount.
- Delivery requirements.
- Payment terms.

Purchase orders provide:

- Financial control.
- Tracking.
- Audit records.

---

10. Contract Review Process

Contracts must be reviewed before signing.

Review areas:

- Pricing.
- Security requirements.
- Service commitments.
- Legal terms.
- Data protection clauses.

Departments involved:

- Procurement.
- Legal.
- Finance.
- Security.

---

11. Procurement Security Controls

Aegis Bank applies security controls including:

- Vendor background checks.
- Data protection review.
- Access limitation.
- Contract security requirements.

High-risk vendors require additional assessment.

---

12. AI-Assisted Procurement Management

Aegis AI OS supports procurement operations.

AI can assist with:

- Vendor comparison.
- Contract analysis.
- Policy retrieval.
- Cost analysis.
- Risk identification.

AI Workflow:

Purchase Request

↓

AI Requirement Analysis

↓

Vendor Data Retrieval

↓

Risk Evaluation

↓

Recommendation

↓

Human Approval

AI does not independently approve purchases.

---

13. Procurement Reporting

Procurement reports include:

- Purchase history.
- Vendor performance.
- Department spending.
- Cost savings.
- Contract status.

Reports support:

- Financial planning.
- Audit readiness.
- Vendor improvement.

---

14. Practical Examples

Example 1 — Cloud Service Purchase

IT department requires cloud infrastructure.

Process:

1. Requirement submitted.
2. Vendors evaluated.
3. Security review completed.
4. Purchase approved.

Example 2 — Security Software Procurement

Security team needs monitoring software.

Process:

1. Vendor security assessment.
2. Contract review.
3. Finance approval.
4. Deployment initiated.

Example 3 — Unauthorized Purchase Request

Employee submits unsupported request.

Process:

1. Request reviewed.

2. Missing justification identified.
3. Request rejected.

---

15. Frequently Asked Questions (FAQs)

Q1. Why does Aegis Bank use procurement controls?

To ensure secure and responsible spending.

Q2. Can departments directly purchase products?

No. Purchases must follow approved procurement procedures.

Q3. How are vendors selected?

Based on cost, quality, security, and compliance.

Q4. Can AI select vendors automatically?

No. AI provides analysis while humans make final decisions.

Q5. Why are purchase orders required?

To maintain financial tracking and accountability.
